

Tensorgrip

LP64

OVERVIEW

TensorGrip LP64 is the LIFE TIME GUARANTEED spray contact adhesive for bonding GLOSS decorative surfaces, and it won't break the bank! It's suitably designed and developed to give a perfect mist pebble spray pattern... It's the industry winner when needing to bond gloss laminates or veneers to a variety of substrates including MDF, chipboard, plywood and many other timber sheet materials.

TensorGrip LP64 is designed for permanent and LIFE TIME GUARANTEED bonding of materials where high grab and superior bond strength are required.

FEATURES

ADJUSTABLE GUN allows you to control the unique spray pattern preventing wastage.

UNIQUE FORMULA prevents soak in of the adhesive on porous surfaces. This provides the user very high coverage and superior film build, resulting in stronger bonds.

LOW ODOUR combined with the fast tack time makes this premium adhesive suitable for on-site and factory applications.

Adhesives That Outperform

LP64

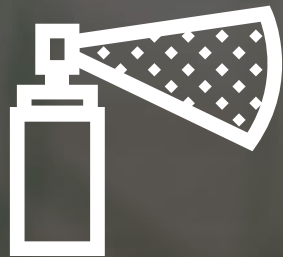

PERFECTION EVERYTIME!

It's no secret that gloss laminates and veneers are a nightmare to bond. They look lovely until you put contact adhesive between the laminate and the board.

But don't panic...

TensorGrip has the answer! The **LP64** is a pebble/mist spray contact adhesive in a pre-pressurised canister that will give you a result the likes of which you will not find with any other adhesive on the market!

Because **LP64** is a mist-spray the adhesive is applied in a very fine and even coat, thus eliminating the possibility of telegraphing whilst applying the gloss laminate!

THE IDEAL CHOICE FOR POST-FORMING

Ever noticed how a Neoprene post-formed laminate can simply be peeled off of the bonded substrate by hand while it is still hot? With **TensorGrip LP64** such things are not possible!

LP64's ability to dry fast and resist high temperatures allows the bond to solidify right out of the post-forming machine, saving you the time typically spent waiting for the glue to cure!

TEMPERATURE RESISTANT UP TO

115°C
